admeo
Where the answers live

Visit us at the New Mexico Wine Conference in Santa Fe - February 25-27, 2024

We'd love to speak with you about saving hours with automation with our star – **SPICA**

- The first assisted modular analytical system with connectivity from any PC, tablet, or phone via web browser.
- User-friendly and intuitive software built into SPICA eliminates the need for a dedicated PC.
- LED light source included 280nm for Total Phenolics Index.
- Extends reagents shelf life by loading directly from box to analyzer.

With local service and support from knowledgeable wine industry experts, we would love to discuss upgrading your laboratory!
